New advanced LPC furnace line with oil quenching in Witten!

- High uniformity carburizing within a batch and batch-to-batch operation.
- High precision control of carbon transfer and case depth.
- Enhanced cleanliness of products.
- Improved mechanical properties, elimination of inter-granular oxidation layer, improved fatigue properties.
- Good uniform carburizing for narrow gaps and deep blind holes.
- Carburizing temperatures up to 1,050° possible.
- Environmentally friendly, no CO2 emission.
- Complies with high health & safety standards.
